

Educator Mentoring Program

Tailored PD for early childhood educators

What is it?

The Educator Mentoring Program is a full in-service program that provides tailored professional development and support to early childhood education and care services on the issues impacting educators. The purpose of these visits is to provide your team with an experienced and independent mentor who will provide objective feedback regarding ideas, approaches and identified/non-identified issues.

Part A Professional Development Workshop

A 2-hour workshop focusing on an identified core need for your service. This is an opportunity to bring your team together for group learning and reflection on best practice.

Part B Mentoring

Includes 6 hours of mentoring inside your service to work on issues most relevant to you and your educators. The mentor will work directly with you and your educators to:

- provide expert advice on any aspect of service delivery
- build confidence in your program and approach
- provide possible solutions to your issues
- engage in professional conversations
- communicate positively in a non-judgemental approach.

Part C Reflection and Advice

This is an opportunity for the mentor to work with the Approved Provider or Nominated Supervisor to discuss their observations. It is an opportunity to speak with a peer about the strengths of your service, your educators and your vision for the future.

What topics can be covered?

The following topics can be included in Part A (select one) and Part B of the program:

- Creative programming and thinking outside the box
- Manage documentation and understand the connections between the National Quality Standard (NQS) and the Early Years Learning Framework (EYLF)
- How to resource your service without breaking the bank
- Create inviting indoor and outdoor play spaces
- Build positive and engaged teams
- Practical approaches in sustainability
- Routines and transitions
